

## Correction TD10 – Groupe 1

### Exercise 1:

A & B -

C-

```
static void triBulle (int[] t) {  
    int i = 0; j, tmp;  
    boolean swap = true;  
    while (i < t.length && swap) {  
        j = 1;  
        swap = false;  
        while (j < t.length - i) {  
            if (t[j] < t[j-1]) {  
                tmp = t[j];  
                t[j] = t[j-1];  
                t[j-1] = tmp;  
                swap = true;  
            }  
            j++;  
        }  
        i++;  
    }  
}
```

And your little class buddy for this TD10 😊 :
